February 8, 2024

Dear Mr. McDade and Seapeak Leadership Team,

We write to you as [B4Ukraine](#), a coalition of Ukrainian and international civil society organisations working to curtail the financial resources enabling the Russian invasion of Ukraine. In the spirit of respect for the fundamental rights of all people, the rules-based international order, and a prosperous global economy, we expect companies to demonstrate public support for the people, democracy, and territorial integrity of Ukraine, opposition to Russia's war of aggression, and alignment with the UN Guiding Principles on Business and Human Rights (UNGPs).

We are writing to enquire about the current status of your business operations and partnerships in Russia concerning LNG, particularly Seapeak's management of ice-class ARC7 LNG tankers, which deliver Russian LNG to European ports.¹

It has been almost two years since Russia invaded Ukraine, and the devastating impacts continue to shock the global conscience and shake the global economy. Russia is violating international humanitarian law (IHL), including war crimes and crimes against humanity, through attacks on civilians and civilian infrastructure (e.g., mass executions, sexual violence, torture, and forcible transfer of civilians). More than 27,500 Ukrainian civilians have been killed and injured, and millions more have been forced to flee their homes, creating one of the most significant humanitarian and refugee crises of modern times. In recognition of the severity of abuses, in March 2023, the International Criminal Court issued an arrest warrant for Vladimir Putin to answer war crimes charges.²

Moreover, recent developments in Russia point to an expanding universe of financial, legal, and reputational risks facing those still conducting business operations with Russia.

¹ Andrea Thomas, "INVESTIGATION. Still spared by sanctions, this Russian gas still exported thanks to France," West France, November 20, 2023, <https://www.ouest-france.fr/europe/russie/vladimir-poutine/ce-gaz-russe-exporte-grace-a-la-france-5c073e20-824e-11ee-a407-397218b61e71#:~:text=ENQU%C3%80TE,-Encore%20%C3%A9pargn%C3%A9%20par%20les%20sanctions%2C%20ce%20gaz%20russe%20toujours%20export%C3%A9,%2DNazaire%2C%20d%C3%A9nonc%20des%20ONG> (accessed December 12, 2023).

² International Criminal Court, "Situation in Ukraine: ICC judges issue arrest warrants against Vladimir Vladimirovich Putin and Maria Alekseyevna Lvova-Belova," March 17, 2023, <https://www.icc-cpi.int/news/situation-ukraine-icc-judges-issue-arrest-warrants-against-vladimir-vladimirovich-putin-and> (accessed March 22, 2023).

In response to this unprovoked and unjustified war of aggression,³ many companies have exited Russia and ceased any operations in the Russian market.

As you will know, in early September 2023, the US Department of State expanded the sanctions regime by officially designating 37 entities engaged in developing Russia's energy production and potential export capabilities, including two associated vessels. These designations include entities and individuals involved in critical energy projects and related infrastructure development, including Russia's Arctic LNG 2 liquefied natural gas export initiative. Furthermore, the list includes entities engaged in procuring materials and technology for future energy projects, areas where Russia has historically depended on expertise and technology from foreign companies.

Consequently, in accordance with [E.O. 14024](#), all property and interests in property of the designated persons that are in the United States or in possession or control of U.S. persons are blocked and must be reported to the Department of Treasury's Office of Foreign Assets Control (OFAC). Any individuals or entities holding direct or indirect ownership of 50 percent or more by blocked individuals or entities are also subject to being blocked. All transactions involving property or property interests of designated or otherwise blocked persons within the United States, by U.S. persons, or transiting through the U.S. are strictly prohibited unless specifically authorised by OFAC through a general or specific licence or if exempt.

These prohibitions encompass any contribution, provision of funds, goods, or services to, from, or for the benefit of any blocked person, as well as the acceptance of such contributions or provisions from these individuals or entities.⁴

Additionally, OFAC issued [Russia-related General License 55A, "Authorizing Certain Services Related to Sakhalin-2"](#) and [Russia-related General License 72, "Authorizing the Wind Down of Transactions Involving Certain Entities Blocked on September 14, 2023"](#), adding to the Specially Designated Nationals and OFAC's Sectoral Sanctions Identifications list two vessels: KORYAK FSU (IMO 9915105) and SAAM FSU (IMO 9915090).

The designation of these two vessels means that any traders collecting LNG from these points will be in violation of US sanctions.

On November 2, 2023, the US Department of State also designated as a target for sanctions ARCTIC LNG 2 LLC, the operator of the Arctic LNG 2 Project, pursuant to section 1(a)(i) of the Executive Order 14024.⁵

As you know, Yamal LNG relies on a fleet of 15 operational ice-class ARC7 LNG tankers to transport Russian LNG. The shipping routes predominantly flow from Sabetta, Siberia (a port which is a joint venture of Novatek and the Russian State) to European ports of Zeebrugge, Dunkirk, and Montoir.

³ The UN General Assembly condemned Russia's "aggression against Ukraine" and demanded that Moscow "unconditionally withdraw all of its military forces from the territory of Ukraine within its internationally recognized borders".

⁴ US Department of State, "Imposing Further Sanctions in Response to Russia's Illegal War Against Ukraine," September 14, 2023,

<https://www.state.gov/imposing-further-sanctions-in-response-to-russias-illegal-war-against-ukraine/>

(accessed November 10, 2023); Executive Order 14024, "Blocking Property With Respect To Specified Harmful Foreign Activities of the Government of the Russian Federation," April 15, 2021,

<https://www.federalregister.gov/documents/2021/04/19/2021-08098/blocking-property-with-respect-to-specified-harmful-foreign-activities-of-the-government-of-the> (Accessed November 10, 2023).

⁵ U.S. Department of State, Fact Sheet "Taking Additional Sweeping Measures Against Russia", November 2, 2023 <https://www.state.gov/taking-additional-sweeping-measures-against-russia/>

The finite number of LNG tankers poses the most significant obstacle for Russia's ambitions to broaden its LNG export capacity.

Yet, five out of the fifteen ice-class ARC7 LNG tankers critical to transporting Russian LNG appear to be managed by Seapeak: Yakov Gakkel (IMO: 9750672); Eduard Toll (IMO: 9750696); Nikolay Yevgenov (IMO: 9750725); Vladimir Voronin (IMO: 9750737); and Georgiy Ushakov (IMO: 9750749).

Please clarify Seapeak's involvement in the transportation of Russian LNG to and from the specified destinations, as well as any additional transactions the company may be conducting related to ARCTIC LNG 2.

Furthermore, we would like to pose the following questions regarding business operations related to Russian LNG more broadly:

- **Could you confirm whether Seapeak is aware of the potential violation of US sanctions that may arise from using Yamal's tankers to transport gas for Arctic LNG 2?**
- **What due diligence processes and mechanisms has Seapeak adopted in order to remain compliant with all EU and US sanctions? Considering the potential risks associated with cooperating with sanctioned entities, does Seapeak have any specific mitigation strategies or measures in place to address these risks and ensure compliance with international sanctions?**
- **Can Seapeak clarify whether it intends to fully terminate business relationships with Russian entities and disengage from Russian LNG export operations? If so, what is the predicted timeline for the exit?**

In consideration of the above points, we request an urgent dialogue with Seapeak's relevant senior management and staff to discuss ongoing activities and relationships in Russia, associated risks to the people of Ukraine, and potential steps to prevent/mitigate these risks. Please contact the B4Ukraine Coalition at contact@b4ukraine.org to schedule a call. We kindly ask for your response by 5:00 pm CET, February 22nd, 2024.

Please note that this letter and any response provided, or lack thereof, will be published on the B4Ukraine webpages. In case you would like to join the proposed call, any such meeting will be held under Chatham House Rules.

Sincerely,

The B4Ukraine Coalition
